This is a great mattress and for this worried about firmness after all the "it's so hard reviews" yes its firm but crib mattresses are supposed to be and it's not that firm. Its comparable to my sons halo bassinet mattress. It has a good give to it when you push on it but baby doesnt sink into the mattress. Don't miss to watch simmons slumberTime plush reviews as it has form of 8 or 11 inch thickness. Beds.org provide you all the correct simmons curv reviews and other mattress ratings by experts. Beds.org has the simmons slumberTime firm reviews along with the simmons curv mattress reviews which are too good as these beds are available in a standard 10 inch thickness.
